

Module Information Pack

CSY3062 Cyber Security and Applied Cryptography

Appendix One – Sample Teaching Schedule

Please, note: from the academic year 2021/2022 the teaching of all UON 20 credits modules will change from a yearlong 26 weeks to a 14 weeks Semester. However, the delivery content will remain the same. That will normally, mean the delivery of two weeks material in one week.

Due to the changing nature of the module topic, the teaching schedule may be altered to reflect the contemporary issues in Cyber security environment. However, the overall module content will not be altered.

Week	Topics
1	Module introduction and overview Explanation of the module and methods of assessment. Good study practice and core textbook. Nile teaching and learning material. Activity 0
	Cyber Security Activity 1
2	Security framework
	Presentations
3	Ethical Hacking and Penetration testing Activity 2
	Concepts of practical security
4	Concepts of practical security Presentations
5	Concepts of cryptography Activity 3
6	Cryptography Models Assignment activity
7 AW1	TCA
8	Cryptography models- Overview
	Hashing Practical Activity

Week	Topics
9	Digital Signatures
	Practical activity
10	Cryptographic Key management 1 Activity
	Cryptographic Key management 2 Activity
11	Cryptographic Systems 1 Activity
	Cryptographic Systems 2 Activity
12	Revision
	Assignment 1 Preparation/support
13	Assignment presentations 1
	Assignment presentations 2
AW2	Assignment 1 submission
AW2
